

GGGGGGG

A DNA double helix structure is shown. The top strand consists of seven 'G' (Guanine) bases, colored orange. The bottom strand consists of seven 'C' (Cytosine) bases, colored blue. The bases are connected by green lines representing hydrogen bonds. A red horizontal line is at the bottom.

CACACA

A DNA double helix structure is shown. The top strand consists of six 'C' (Cytosine) bases, colored blue. The bottom strand consists of six 'G' (Guanine) bases, colored orange. The bases are connected by green lines representing hydrogen bonds. A red horizontal line is at the bottom.
